

AMENDMENTS TO THE SPECIFICATION:

The changes in the following paragraphs from their immediate prior version are shown with ~~strikethrough~~ or ~~[[double brackets]]~~ for deleted matter and underlines for added information.

Please amend paragraph 00144 on page 26 as follows:

[00144] Based on the data in Table 1 above, it would take about five times more menthyl glutarate and about half as much *l*-isopulegol to equal the cooling effect of WS-23. However, as shown in the examples below, about the same level of menthyl glutarate as WS-23, along with a very low level of ~~ispulegol~~ isopulegol and/or ~~menthenediol~~ menthanediol, gives a similar level of coolness compared to WS-23 in hard candy and chewing gum.
